

1ST CALL FOR PROPOSALS

OPEN TO SCIENTISTS FROM ACADEMIA AND THE INDUSTRY

Send your pre-proposals before:

October 23rd, 2023
12:00 am CEST

Applications are now open for researchers interested in accessing the AgroServ research services and installations!

The Horizon Europe AgroServ launches its first call for proposals open to **scientists from academia or the industry** working on projects that address **interdisciplinary topics related to agroecology** and who want to access our research services and installations to conduct their research. Access is granted on the basis of **scientific excellence** to ensure feasibility of the projects and their scientific quality.

The **application procedure is divided into two main steps** to ensure that the proposals submitted fulfil the “interdisciplinary transnational” criteria: a pre-proposal submission & a full proposal submission. Access can only be granted when the full proposal is submitted. [Learn more](#)

AgroServ Launches its 1st Call for Proposals Open to Scientists

AgroServ, in a Nutshell

Faced with complex challenges that range from agricultural land depletion, the loss of biodiversity and the growing scarcity of natural resources, AgroServ aims to adapt our current agricultural production methods to continue producing agricultural goods while concomitantly maintaining, preserving, and adapting ecosystems to current and future global change challenges.
